Concern # 1: Due to the high number of fishers in Wisconsin it is causing a negative impact on many of the game species in the state (such as rabbits, grouse, turkeys, and domestic animals). I would like to propose two fisher tags be issued for every trapper's license purchased, and the season to be extended to the end of January.

Beit resolved that the conservation congress at its annual meeting in Taylor County on April 10, 2006, recommends that two fisher tags be issued for every trapper's license purchased, and the season be extended to the end of January.
